Hi drinking water folks,

I just wanted to let you know that WV DEP issued the NPDES permit for the Washington Works/Chemours facility (attached). I looked over the PFOA and HFPO Dimer Acid limits to see if there were any changes from the draft public notice permit to this final permit. There were no changes in the limits other than the typographical error for the HFPO limit at outlet 006 which was addressed in the response to comments document.

Let me know if you have any questions.
Carissa
